## PROJECTS

**FOR THE LOVE OF HIS GAME:** An application built for football families across the globe to come together to teach children tackling techniques, workout regiments, and good nutrition. Built with AngularJS on Rails and Bootstrap.

**VAGABOND:** A travel site where users can post their most memorable voyage while helping others with recommendations of where to lodge and dine. Built with Ruby on Rails, Bootstrap, and Devise.

**MOTIVE-ME:** A full stack web application to help motivate people to live a healthier lifestyle through nutritional tips, exercise, and motivational quotes. Built with MongoDB, AngularJS, Express, and Node.js.

**CURLS:** An inspiring full stack web application where people can share their curly hair experience with others to encourage self-love, confidence, and embrace their natural curls using non-toxic products. Built with JavaScript, jQuery, Handlebars, Mongo, Mongoose, Express, and Node.js.

**HANGMAN:** One intriguing guessing game, where you predict the word or phrase before the hangman picture appears. This game was built with JavaScript, jQuery, HTML, CSS.

## EXPERIENCE

April 24, 2017 – July 26, 2017

### GENERAL ASSEMBLY, **WEB DEVELOPMENT**

Completed over 500 hours, 12-week immersive course in full stack development. Developed 5 web applications where I've dedicated to design and innovation.

July 7, 2007 – April 21, 2017

### GWINNETT COUNTY SHERIFF'S OFFICE, **ADMINISTRATIVE ASSISTANT**

Recorded more than 300 timesheets bi-weekly. Updated and maintained department rosters. Uploaded inmate release files to an archive. Assisted customers with open record request including expungements. Scheduled roughly 70 inmates for court daily and outside medical appointments. Interviewed inmates for their personal information. Computed charges into a database. Collected fees and processed property and bonding company bonds for proper release of an inmate.
